Probiotic Ampoule

Clarifying Ampoule

Hydroboost Ampoule

Bright Ampoule

Hyaluronic Ampoule

Intensity Ampoule

Rescue Ampoule

A unique 2-part professional product that adds billions of live probiotics to rewild the skin.

A combination of actives, including Niacinamide, that work synergistically to normalise sebum production and balance problem skins.

Ideal between-season boost for all skins; hydrates, moisturises, soothes, and rebalances skin using Myrothamnus extract and postbiotics.

This targeted treatment uses multifunctional actives and Phenylethyl Resorcinol to brighten the skin by helping regulate natural melanin production.

Packed with Low Molecular Weight Hyaluronic Acid, this targeted treatment deeply hydrates and plumps fine lines.

The use of a muscle relaxant plant extract provides strong and rapid wrinkle reduction, visibly reducing the appearance of expressions lines in just one treatment with an overall smoothing effect on the skin.

This formulation delivers active ingredients, including Propionic Acid, that alleviate acute irritation while supporting and improving the skin's barrier function to calm sensitive skin.

-Subclinical inflammation
-Skin ageing
-Imbalanced microbiome

-Younger skins
-Breakout-prone skin
-Clients undergoing detox

-Environmentally stressed skins
-Roaccutane users
-Sensitised and easily irritated skin

-Mix part 1 and part 2 together and set aside to allow for activation. It is recommended that the mixing of the two vials be done at the beginning of the facial procedure and left aside until needed.
-Following the facial massage, gently shake the vial prior to applying the ampoule to the skin.
-Follow the ampoule application with the application of the Exclusion Mask for best results.

-Peel off the foil seal, remove the rubber stopper and fit the plastic nozzle onto the vial.
-Apply 12 drops to your client's facial treatment area before moisturising.

Contraindications
-Not suitable for sensitive skins or clients on medically prescribed exfoliating products.
-Perform a patch test if aspirin allergy is suspected.

-Peel off the foil seal, remove the rubber stopper and fit the plastic nozzle onto the vial.
-Apply 12 drops to your client's facial treatment area before moisturising.

-Peel off the foil seal, remove the rubber stopper and fit the plastic nozzle onto the vial.
-Apply 12 drops to your client's facial treatment area before moisturising.
-Best results will be achieved with a course of 4 treatments, ideally once weekly.
Contraindications
